

How to check and Update Renaissance Place Software

Log in as the machine administrator.

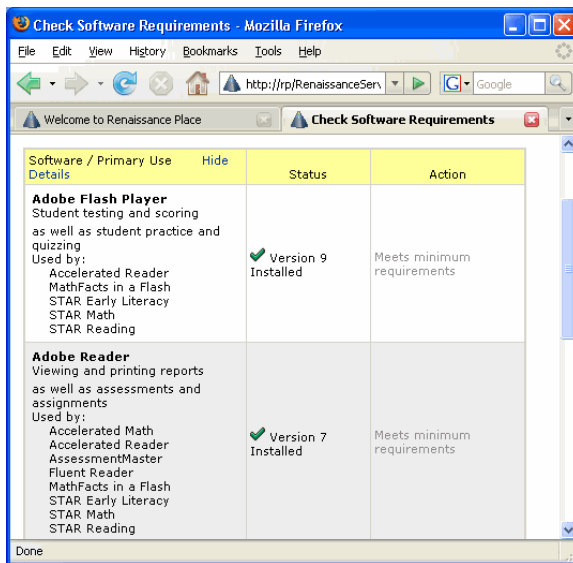

This must be done for both browsers to verify.

Open Firefox or Internet Explorer.

Go to the Renaissance Place Webpage. (easiest is to type **rp** in the address line)

At the bottom of the page is the **Check Software Requirements** Link so click on it.

When it opens there is page as below showing whether or not the software meets the minimum requirements..

If it doesn't meet the requirements follow the link and install the updated software. (Use the defaults when you install any of these except do **NOT** install any extra toolbars like Google, Yahoo, etc.)

Go back and check again after any software has been installed until not further updates are required.
